

WHAT WE HAVE THAT DIFFERENTIATES OURSELVES FROM OTHERS:

A lean and professional team and the direct involvement of senior executives in all projects
An excellent steel cost through direct sourcing from steel and tube mills.
In-house processing and manufacturing capacity.

Investment in cutting edge plant and equipment – resulting in improved processing efficiency and quality of our manufactured steel products
Excellent quality and strong internal controls

QINISA STEEL SOLUTIONS IS:

A South African Level 2 BBBEE company, giving our customers 125% procurement recognition a 51% black-owned business
ISO 9001:2015 certified
based in Alrode, Gauteng, South Africa

Qinisa Steel Solutions focuses on the light to medium manufacturing sector, basing our contribution around our state of the art fiber laser cutting technology. We're involved in the Renewable Energy sector as well as within the mining, construction, manufacturing and engineering sectors in South Africa. In this way we not only empower our partners and clients, we help grow the economy in a meaningful way creating jobs and economic opportunity

WHAT WE DO:

Our focus is on steel component manufacture and fabrication using best of breed equipment:

- Tube fibre laser cutting and bending (Italian BLM machines)
- Flat steel fibre laser cutting and bending (Swiss Bystronic machines)
- Steel section cutting, punching, slotting and drilling (Italian Ficep equipment)
- Manual and robotic welding
- Out-sourced galvanizing and coating
- Sales of sheet, plate and section to select customers

QINISA STEEL SOLUTIONS ADDS VALUE TO STEEL FOR THE FOLLOWING SECTORS:

Renewable energy – solar PV
Rail - carriage and locomotive
Light and medium engineering
Automotive components - laser cut and welded assemblies
At Qinisa we get very involved with our customers' unique designs and assist with tailoring our processing and fabrication capabilities to customers' needs.

OUR STRENGTHS LIE IN:

Our integrated processing capacities across the steel value chain. Project managing and quality controlling all aspects of the supply chain, until final delivery to site.

NEW MACHINERY ON SITE:

These recent investments allow us to offer:

Highest cutting and bending quality with repeatable accuracy lowering the cost of downstream manufacturing and assembly. Material cutting capabilities include mild steel, stainless steel, aluminium, copper and galvanized product.

BLM LT Fiber tube laser

BLM tube benders

Ficpe beam drilling line

Robotic and manual welding machines

Bystronic fibre lasers and Bystronic press brakes

Calburn high-definition plasma cutter

WE ARE A PREFERRED SUPPLIER TO OUR CUSTOMERS BECAUSE:

We are a trusted, professional company with a top-quality management system.

A Level 2 BBBEE local South African company that is >51% black-owned.

We offer competitive pricing for all finished steel components

We are easy to do business with!
